

# *World Water Day*

## *22<sup>nd</sup> March*

Water is essential for life. Yet many millions of people around the world face water shortages, children die from water-borne diseases and drought regularly afflicts some of the world's poorest countries. It is an urgent matter of human development, and human dignity to provide safe, clean water to all the world's peoples.

The people of Southern Sudan suffer greatly from a shortage of water. During December, Akol Mager, a Sudanese man who now calls Toowoomba home recorded the flowing of water from wells close to his family's home.

These wells are the result of collaboration between the Social Justice commission and Garden City Rotary and are making a huge difference to the people they serve.

Come to hear Akol speak of his experience at the handing over of wells in Southern Sudan
